

EXPERIENCE

Model Validator - Raiffeisen | Full Time

2026 - Present

- Independently review quantitative and statistical models, methodology, assumptions, performance, implementation, controls, and documentation.
- Communicate analytical findings and practical recommendations in model-risk and regulatory contexts.

Risk Model Validator - OTP Group

June 2025 - May 2026

- Built a configurable Python time-series validation tool and validated credit, market, and liquidity risk models.
- Co-developed group-level non-credit risk model validation and development regulation.

Teaching Assistant - Corvinus University of Budapest

February 2024 - June 2025

- Supported Econometrics, Time-Series Analysis, and Statistics courses.

SELECTED RESEARCH

Symbolic Survival Credit Risk

Auditable discrete-time hazard modelling with time-based validation, calibration, benchmark models, and reproducible public data.

Regional Educational Inequality in the EU

Spatial panel modelling, spatial autocorrelation, convergence analysis, and machine learning across European regions.

Budapest Markov Passenger-Flow Framework

GTFS-derived continuous-time Markov chains, stochastic simulation, and network-resilience analysis.

PROFESSIONAL ACTIVITIES

Vice President of Finance & Corporate Relations

FAKT College for Advanced Studies | July 2025 - June 2026

- Led annual financial planning and budgeting; organized competitions and lectures; managed two teams of 10-15 members.

EDUCATION

Corvinus University of Budapest

MSc Economic and Financial Mathematical Analysis
2023 - 2028 (expected)

Relevant courses
Quantitative Finance, Time-Series Analysis,
Econometrics, Deep Learning, Algorithm Theory,
Probability, Statistics

TECHNICAL SKILLS

Languages

Python, R, SQL, C++, VBA

Modelling

Risk models, time series, Bayesian methods, survival analysis, spatial econometrics

ML / research

PyTorch, Stan (MCMC), scikit-learn, reproducible experiments

Tools

Git, LaTeX, Tableau

COMPETITIONS

GEM x Morgan Stanley Statistics Competition

2nd place | 2025

Everesteer Hackathon

Participant

IMC Prosperity

Participant

LANGUAGES

Hungarian - Native
English - C1 Advanced
German - B2 Upper-Intermediate

CORE STRENGTHS

- Quantitative problem-solving
- Independent model challenge
- Research design and communication
- Cross-functional leadership
